Self-priming plunger pump fits 15-55 gal. drums. Intake tube is 1 1/4” OD x 18” long; screw-on extension increases total length to 37 3/8”. Stroke length of 17” delivers 7.5 oz. per stroke. **E-Z SMART DRUM FUNNEL**
Smart Funnel prevents overfilling of barrels.

With the funnel extension, trapped air stops the liquid from filling to the top of the barrel. It leaves just enough room to add 2 gallons more to the barrel, which is the capacity of the E-Z SMART DRUM FUNNEL.

In order for the Smart Funnel to work properly, it must be removed immediately when fluid no longer flows freely. This means the drum is full and cannot take any more fluid.
